Re: Underground Monitor Well Drilling Program, Co-Op Mining Company, Bear Canyon Mine, ACT/015/025, Folder #2, Emery County, Utah

I spoke today with John Garr, Earthfax Engineering, a hydrologic consultant for Co-Op Mining Company, about the status of the underground drilling program approved December 10, 1991. The draft of the report was submitted to Co-Op Mining Company on July 6, 1992. He stated that it should be forwarded to the Division soon.

I asked him why it has taken so long. He stated that the drill broke down often, the drill was used for exploration in the mine often, and the results of the analyses took longer than expected.
